1. General Information

Below you will find instructions on how to install Trafikverkets ProjectWise Explorer. Note that the instructions are valid for a Windows 64bit-client in which ProjectWise has been installed in the default directory.

2. Set-up of the ProjectWise Explorer

a) Installing the ProjectWise Explorer with DGN Navigator:

Download Trafikverkets ProjectWise Explorer client from <u>Trafikverket.se</u>. Unpack the Zip-file on your computer.

Start the file "pwclt10000296en.exe".

Only the following features should be checked, see picture below, press the arrow to the left of "ProjectWise Explorer" to expand the installation options. (If you want integrations turned on you can check the boxes below "iDesktop Integration")

, ,		

b) Installing language support for ProjectWise Start the file ProjectWise Language Pack - Swedish (x64).msi

Language will be picked later on with the User Tools from the start menu. Note that the Excel Import/export templates that Trafikverket are using require picking English.

c) Uninstalling the CONNECTION Client.

Trafikverket does not use CONNECTION Client, so it must be uninstalled:

Avinstallera eller ändra ett program

Du kan avinstallera ett program genom att markera det i listan och sedan klicka på Avinstallera, Ändra eller Reparera.

Ordna 🔻 Avinstallera					•
Namn	Utgivare	Installation	Storlek	Version	
🝌 Adobe Reader XI (11.0.18) MUI	Adobe Systems Incorporated	2016-10-13	511 MB	11.0.18	
CONNECTION Client	Bentley Systems, Incorporated	2016-10-25	170 MB	10.0.6.34	
📾 Hitta Skrivare	Trafikverket	2015-09-08	144 kB	1.00	

d) DNS Services and DataSource Listing

NB! If you install the <u>IDA add-on or the Weblinks add-on</u> the changes below to DNS and DataSource will happen automatically and will not require manual configuration. If you are unsure about these add-ons, contact your data coordinator.

DNS Service should be configured to reach:

- PWIS.trafikverket.se, Port 5800
- PWIDAExt.trafikverket.se, Port 5800

Datasource Listing should be configured to reach:

- PWIS.trafikverket.se, Port 5800
- PWIDAExt.trafikverket.se, Port 5800

Choose the following menu to open a dialog.

First choose the tab DNS Services. Enter an address (same address for both Name and Hostname), enter the port number, and press Add. Repeat for the next address. Then press Save. (This will require administrator rights on the computer.)

, 3		

Then choose the tab Datasource Listing and do the same process as you did on the previous tab. Press Save. You can now close the dialog window and restart the program for these changes to take effect.

Servers	Datasource List	ing iDesktop A	uto-Login	General	DNS Services	Datasource Listing	iDesktop Au	to-Login
Name	Hostname	Port		Nam	ne	Hostname	Port	
			Add					Add
		1	Modify	PV	VIS.trafikverket	PWIS.trafikverket.se	5800	Modify
			Remove	PV	VIDAExt.trafikv	PWIDAExt.trafik.ver	5800	Remove
					n			

e) Configuring Preview of files

After the installation of ProjectWise Explorer and its accompanied components is finished, a text file that you will find under the installation directory needs to be replaced with a new one in order to allow previews of word files and excel files.

This means we will copy the file pwviewer.cfg to the directory (replace the already existing file) *C*:*Program Files (x86)\Bentley\ProjectWise\bin*

f) Basic set-up is finished

Trafikverkets ProjectWise client is now installed. In order to install additional add-ons that Trafikverket carry responsibility for, look for them on <u>Trafikverket.se</u>. If you are unsure which add-ons or rights you need, contact your data coordinator or a contact person at Trafikverket.

g) User Manuals

In order to begin working in Trafikverkets ProjectWise client and the different datasources you can use a manual for each of the datasources. You will find these under the headings "Mer om" at <u>Trafikverket.se</u>.
